PROFESSIONAL EXPERIENCE(4 YEARS)

- Presently working as a software Engineer in **HCL Technologies India Pvt Ltd, Bangalore** from **November 2020 to till date.**

Project Name: NIKE MCE2 (MY CONSUMER EXPERIENCE)

Client : Experian Services India PLC(01/June/2021 – Till Date)

Project Type : Credit Report System,

Role: Java Developer

Project Description:

NIKE MCE (MY CONSUMER EXPERIENCE) is Credit Report System project.

The scope of the Project is to provide services to the Experian Customers related to their Credit Score Reports.

Allows user to Check their Credit score and if any fraudulent occurred without the concern of the consumer they can raise a dispute, providing document of proof.

User can Freeze, Lift and Thaw their report for a particular time period.

Worked on Migration of Charger to CUDA where charger is legacy.

Worked on migrating functionality named Descriptor and developed a new endpoint, where users can see their options associated of raising dispute, as the name suggested it is a descriptor for a dispute.

Developed a new endpoint get Dispute Descriptor as part of migration which describes the list of reasons we can able to dispute.

Worked on new endpoint Get Statement Options which give list of statements that consumer can add to their profile.

Developed a Scheduler which retries Freeze Notifications for every ten minutes.

Working on migrating applications running in Appcanvas to AWS.

Hands-on experience on AWS application.

Currently working on Disputes Docupload, which is enhancing on dispute process as per different client requirements.

ROLES & RESPONSIBILITIES:

As a java Developer involved in:

I've developed and enhanced some of the new functionalities to the existing project using java with **Spring Boot** Framework.

Involved in various phases like requirement gathering, analysis, developing and testing.

Created Services to consume **REST API'S** and communicate between components using **Dependency injection**.

Based on the requirement Developed **POJOS** for Data Model.

Covering Junits for all Scenarios of developed endpoints.

Scripted test suite to automate Testing using Robo Framework.

Scripted Locust scripts and run Performance Testing for our applications.

Worked on smoke and component Testing.

Worked on fixing the defects from production and involvement to deploy till Production.

Production support on the release date and working if any issue arises.
